

Good Habits. Good Print.™

## Habitat® Calcium Rinse & Additive

Calcium is great for your bones, bad for your press. If you want calcium in your body, drink milk. If you want calcium off your press, use Habitat Calcium Rinse & Additive. (Please don't get the two confused.)

### ***Habitat Calcium Rinse & Additive Use:***

**Fountain Solution** - When added to the fountain solutions water mixture, this product will prevent and stabilize pH drift. Blankets and rollers will also remain cleaner with less "white" build-up (add ½ to 1 ½ oz per gallon of mixed fountain solution in water).

**Blanket and Impression Cylinder** – Applying Habitat Calcium Rinse & Additive to a rag with blanket and impression cylinder cleaners makes cylinder cleaning fast and simple.

**Final Roller Rinse** - This product is also used as a calcium rinse for ink train rollers. After all of the rollers have been cleaned and are free of ink and with wash up blades on, apply a liberal amount of Habitat Calcium Rinse and Additive to the rollers followed by a water rinse. Continue the water rinse until the run-off water appears clean and clear.

VOC: 0.4lb/gal 48 g/l

Flashpoint >200° F

Does not contain SARA 313, HAP's or Prop 65 chemicals

Meets South Coast Air Quality Management District Rule 1171

### **Packaging:**

Quart/947ml (9per Case)
