

Good Habits. Good Print.™

## Habitat® PrintKleen™

Did you know that your chrome and rubber rollers are hydrophilic when they are clean, and oleophilic when they are dirty (didn't know we were printing press shrinks did you?) Yes, your chrome and rubber rollers are hydrophilic – water loving – when clean and oleophilic – ink/oil loving – when they are dirty. Fortunately Habitat has the cure for oleophilic rollers. A dose of PrintKleen™ is a dampening roller conditioner and will get those rollers absorbing water again and repelling ink.

### **Habitat PrintKleen™ Use:**

Metering/Chrome Roller Desensitizer & Conditioner -

PrintKleen™ is applied to metering and chrome rollers after they have been wiped clean with your favorite Habitat Coastalkleen™ Wash. Apply one or two heavy lines of PrintKleen™ to the rotating metering and chrome rollers.

Plate Desensitizer & Conditioner -

Engage dampening form to the plate and allow to rotate at a slow idle. Apply one or two heavy lines of PrintKleen™ to the metering or chrome roller and allow plate to make 4-6 revolutions.

VOC: 0

Flashpoint >200° F

Does not contain SARA 313, HAP's or Prop 65 chemicals

Meets South Coast Air Quality Management District Rule 1171

### **Packaging:**

Quart/947ml (9per Case)

2 ½ Gallon/9.5 Liter

5 Gallon/19 Liter

30 Gallon/114 Liter

55 Gallon/210 Liter

Made in the USA by Americans
