

Good Habits. Good Print.™

Habitat® Non-Grit Roller Paste

We want your rollers as smooth as a baby's behind, but without introducing calcium to the rollers. That's why Habitat Non-Grit Roller Paste doesn't use talc as the thickening agent. And since it is non-gritty, easy-washing, roller-prolonging and won't introduce more calcium to your rollers, Habitat Non-Grit Roller Paste requires less work, is safer to handle and gives great results.

Deep Cleaning and Deglazing Procedure:

1. Engage your wash-up blades and apply Habitat roller wash to the ink roller train.
2. Disengage wash-up blade(s) and apply a liberal amount of Habitat Roller Paste and allow to work into rollers for 5-8 minutes at high idle speed.
3. Engage wash-up blade and flush roller train with a Habitat roller wash.
4. Rinse roller train with Habitat Calcium Rinse & Additive followed by a final water rinse.

You're ready to ink the unit.

VOC: 0

Flashpoint >200° F

Does not contain SARA 313, HAP's or Prop 65 chemicals

Meets South Coast Air Quality Management District Rule 1171

Packaging:

2lb/907 g tub (4 per case)
