

Good Habits. Good Print.™

Habitat® Universal Fountain Solution

We call this stuff "universal" because, well, just about anyone in the universe with opposable thumbs could use it. So far though, we've only been able to test on our Earth-bound printing technology, but we've found that Habitat Universal Fountain Solution works universally with good ink, bad ink & great ink (which is Habitat's brand of course). We've tested plastic and metal plates of Earth origin and found that yes, it works universally with both plates as well. Web and Sheet fed presses? Universal once again. So you can see why we call it Universal Fountain Solution—it easily works with everyone and everything in your pressroom. And like space, our fountain solution is so clean you can't smell a thing.

Habitat Universal Fountain Solution Use:

Recommended Roller Settings

Set all form rollers slightly heavier to the oscillators and chrome than to the plate

- Water form to plate stripe: 3-4mm
- Water form to chrome: 4-5mm
- Ink form/s to plate: 3-4mm
- Ink form/s to oscillators: 4-5mm
